DATE MAILED: 03/03/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

H.A

Office Action Summary	Application No. 10/501,235	Applicant(s) WHITE, ROWLAND	
	Examiner Brigitte R. Hammond	Art Unit 2833	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-22 is/are pending in the application.
4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-22 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date ____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: ____.

DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed July 12, 2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Objections

Claim 22 is objected to because of the following informalities: "a flat contact surface the other blade lying on opposite sides of the channel in lines 4-5 is unclear. For purposes of examination the Examiner shall assume "the blades lying on opposite sides of the channel". Appropriate correction is required.

Claims 1-22 should be thoroughly checked for proper antecedence. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Odley et al. 5,836,782 in view of Jenson et al. 5,759,061. Odley et al. disclose a contact 10 for establishing electrical connection with an electrically conductive wire,

comprising: a base 40 and a two elongate blades 2,4 extending from the base and defining therebetween a channel within which a wire 8 is to be received, a first blade 2 of the two being flat and a second blade 4 being shaped, a flat contact surface of one blade being opposite a cutting edge of the other blade and lying on opposite sides of the channel, the flat contact surface maintaining the wire substantially parallel to the flat contact surface through the channel and the cutting edge of the other blade pointing towards the flat contact surface (see fig. 1A).

Regarding claim 13, the second blade 4 is shaped so as to present the flat contact surface to the cutting edge of the other blade.

Regarding claims 22 and 24, the contact is manufactured from a planar material (sheet metal).

Regarding claim 14, the shaped blade prescribes an arc about an axis parallel to the longitudinal axis of the shaped blade.

Regarding claim 15, the blades each have two major surfaces (at 2 and at 4) and two minor surfaces 2a,4a and the flat contact surface comprises a minor surface of one blade proximate the other blade.

Regarding claim 16, the blades each have two major surfaces (at 2 and at 4) and two minor surfaces 2a,4a and the flat contact surface comprises a portion of a major surface of one blade proximate the other blade.

Regarding claim 17, the cutting edge comprises a corner of a major surface 34 with a minor surface 36 of the other blade.

Regarding claim 18, the flat contact surface lies in a first plane and the planes of the two surfaces defining the cutting edge lie in a second and a third plane respectively, the second and third planes being respectively between 30° and 60° to the first plane (as shown in 1A).

Regarding claim 19, the second and third planes are in a region of 45° to the first plane.

Regarding claim 20, Odley disclose a contact 10 for establishing electrical connection with an electrically conductive wire, comprising: a base 40 and two elongate blades 2,4 extending from the base and defining therebetween a channel within which a wire 8 is to be received, a first blade 2 of the two being flat and a second blade 4 of the two being shaped, a flat contact surface of one blade and a cutting edge of the other blade lying on opposite sides of the channel, wherein a line drawn parallel to the flat contact surface and passing through the point defined by the end of the cutting edge is not parallel to either of the surfaces defining the cutting edge.

Regarding claim 21, Odley disclose an insulation displacement connector, comprising: a contact 10 manufactured from a planar material and having a base 40 and two elongate blades 2,4 extending from the base and defining therebetween a channel within which a wire 8 is to be received, a first blade 2 of the two being flat and a second blade 4 being shaped, a flat contact surface of one blade being opposite a cutting edge of the other blade and lying on opposite sides of the channel, the flat contact surface maintaining the wire substantially parallel to the flat contact surface

through the channel and the cutting edge of the other blade pointing towards the flat contact surface.

Regarding claim 22, Odley et al. disclose an insulation displacement connector, comprising: a contact 10 manufactured from a planar material and having a base 40 and two elongate blades 2,4 extending from the base and defining therebetween a channel within which a wire 8 is to be received, a first blade 2 of the two being flat and a second blade 4, the blades lying on opposite sides of the channel, wherein a line drawn parallel to the flat contact surface and passing through a point defined by the end of the cutting edge is not parallel to either of the surfaces defining the cutting edge.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gerket al. 4,611,874, Glaser et al. 5,911,593 and Jensen et al. 5,759,061.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brigitte R. Hammond whose telephone number is 571-272-2006. The examiner can normally be reached on Mon.-Thurs. and Alternate Fridays from 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula A. Bradley can be reached on 571-272-2800 ext. 33. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
